Keywords : telephone, gesture, awareness, emotion

In this research, A people is performed a gesture of one's hand in the natural during a telephone call. A portable telephone tell only speakers voice. However, addition of a portable telephone tell possible other information. Thereupon, author hits upon a good idea which is telling a gesture of one's hand. A gesture of one's hand has various meaning. For example, stress, give response.

This experiment compares normal telephone, normal telephone add switch and normal telephone add a gesture of one's hand. But, A gesture of one's hand moving which a testee's hand move up through down was decided in this experiment. Testee are a team of two people who are friend or conversation usual before.

As a result, this system is better than telephone. This system possible use in this town. Listener receive and feel emotions which is laugh, appeal, stress, pointing in conversation, surprised. Speaker tell emotions which is not believe, is apologize, want to listen this point in conversation. Therefore, this research made it possible, Speaker tell various emotion listener.
